

test_cmpr_1.grc

The purpose of `test_cmpr_1.grc` is to demonstrate the use of the comparator element `cmpr_1_1.xbe`. A plot of the input and output of the comparator versus time illustrates how this element works. Note that the parameters `delt_nrml` and `delt_min` of `cmpr_1_1.xbe` are used by the simulator to control the time steps in order to resolve the comparator output transitions properly.
